Facilities/Equipment/Safety committee meeting minutes
May 1, 2024

In attendance
Byron Kassing
Aleece Decker

No public in attendance

Call to order 4:00 p.m.

Item A - tabled for future meeting with all members present.

Item B - tabled for future meeting with all members present

Item C - if funding is available from existing budget the recommendation to paint classrooms by the committee.

Item D - repair needs of the building siding should be performed over summer break. The north wall of Ms. Vogt's room in particular shows considerable deterioration and may allow mice to enter the wall.

Item E - A new Boiler pump is scheduled to be installed in the near future by DW Burns plumbing. The new pump is on site. The 2nd pipe also fairly new is not installed plumbing to fixture. This stall should be researched I discover if an adjustment is needed to operate properly. Also worth considering re- insulating the piping as some pipe wrap insulation has been removed during the repairs over the years.

Item F - Aleece has located plastic barriers that could be installed around the playground that could potentially mitigate wind distribution of playground wood chips. The cost is \$338 dollars for 40 lineal feet. Should consider extending the existing barrier between playground and basketball court then continuing to the west side of the school building. Also discussed placing a mesh fence product on the lower portion of the fence to collect wood chips from scattering off the playground from the wind.

Item - G the new floor scrubber has arrived and in use.

Next FES meeting scheduled 5/15/2024 @ 4:00 p.m. in the school library

Meeting adjourned 4:12 p.m.
